Developing the next step in horticulture

www.hollandgreentech.com

About us

who are we?

Since 2015, Holland Greentech has been transforming horticulture across Africa by providing farmers with quality inputs, superior equipment, and practical expertise for sustainable agricultural success.

We deliver comprehensive agricultural solutions to Rwanda, including soil and water analysis with fertilizer recommendations, biological soil improvers, premium vegetable seeds, irrigation systems, greenhouse construction, and professional training and consultancy services.

Headquartered in Kigali with regional offices in Kayonza, Musanze, and Karongi, our team of 100 professionals serves smallholder farmers, commercial enterprises, government agencies, and educational institutions across Rwanda.
Holland Greentech—Your trusted partner in agricultural excellence.

CONTENTS

OUR VISION

Our vision is to fundamentally alter the trajectory of horticulture in Africa and ensure that farmers have access to quality inputs, equipment, rich soil and practical knowledge to go along.

We are not only driven by the company growth but also our impact to farmers. Every year, we thoroughly measure our impact against a control group in each country of operation.

On average, farmers working with Holland Greentech increase their incomes on supported activities from by at least 50% and attain 100% return on their investment in the first 3 years of operations

OUR PRODUCTS

OUR SEEDS

Gamhar RZ F1

- Elongated plum tomato
- Quite open canopy
- Very productive
- Elongated, jointless fruit
- Average fruit weight : 100-120 gr

Jarrah RZ F1

- Semi-determinate plum tomato
- Good vigour and canopy cover
- Unicolour, firm fruit
- Elongated plum fruit shape
- Fruit weight: 80-100 gr

Monteliga RZ F1

- Easy to manage
- Disease resistance
- Good performance in dry and wet conditions
- Marketable fruit quality
- High yield

Fortesa RZ F1

- Cherry tomato
- Compact plant type
- Easy fruit set
- Good continuation in production
- Indeterminate habit

Tacoma RZ F1

- White cabbage
- Flat round head shape
- Blue-green leaf colour
- Strong against thrips and fusarium
- Strong vigour
- Thin leaf layering
- Sweet taste

Twistma RZ F1

Twistma RZ is a round white cabbage with robust plant frame and a weight range of 2,0 to 3,8 kg. Early filling provides a compact fresh market product as well as good suitability for convenience. The long field standability underlines its famer friendly character and flexible use

Redma RZ F1

- Red cabbage
- Compact head
- Good field standability
- Intense red colour
- Head weight: 1 to 3 kg
- 75 to 85 days after transplanting

Nantes 5 RZ F1

Carrot

- Cylindrical shape
- Uniform
- About 115 days after sowing

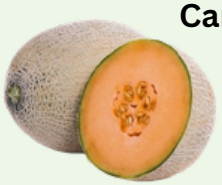

They have a good orange colour, smooth skin and strong foliage. Monanta RZ produces a high yield, has long field standability and is suitable for the fresh market.

Benue RZ F1

African eggplant

- Large fruit size
- Extended shelf life
- High yield

Carribean king RZ F1

Sweet melon

- **Orange flesh**
- **Average fruit weight: 2.2 kg**
- **High sugar content**

Fantastic RZ F1

Round eggplant

- High fruit quality
- Long shelf life
- High yield

Kazinga RZ F1

African eggplant

- African eggplant
- Oval shape
- Attractive white cream colour
- Early and high yield potential
- Good shelf life

Kylian RZ F1

- Blanched Celery
- Upright growth habit
- Green stem colour

Red Jet RZ F1

- Red blocky pepper suitable for green harvest
- Excellent resistance pattern
- Easy fruit setting variety
- Good production
- Short plant habit

Ilanga RZ F1

- Yellow blocky pepper
- For indoor production
- Easy fruit setting variety
- Fruit weight: 220 – 250 gr
- Nice fruit shape and colour
- Medium long plant

Bologna RZ F1

- Long cucumber
- Produces dark green fruits upto 38 cm long
- Good plant vigour, parthenocarpic
- Powdery Mildew resistant

Mydas RZ F1

- Slicer cucumber
- Average fruit length: 22 cm
- For indoor and open field cultivation
- Parthenocarpic variety
- High quality fruit and high yield

Tahoe RZ F1

- Fresh market type
- Early season variety
- Very uniform
- High yield potential

Casper RZ F1

- White Cauliflower
- Fresh market and processing industry
- Good for desert southwest region, warm coastal California and continental Autumn
- Stable and uniform variety

Mawenzili RZ F1

Habanero pepper

- Red African Hot Pepper
- Average Fruit weight 12 – 15 grams
- Good heat set

Gladial RZ F1

Sweet melon

- Yellow canary type
- Very good plant vigour
- Uniform fruit size
- Smooth skin and nice skin colour
- Very productive
- High sugar content

Afadja RZ F1

Habanero pepper

- • Attractive shiny red colour when mature
- • Fruit shape oval
- • Average length of fruits : 5.5 cm
- • Average weight of fruits : 15 gr
- • Aromatic, high pungency
- • Maturity in days after transplanting : 50 - 55
- • Early variety with high yield
- • Adapted for long cycles
- • Good continuation

charsano RZ F1

Swiss chard

- White-vein, hybrid Swiss chard
- High yield potential
- Fast-growing variety
- Baby leaf production for all regions
- Offers good uniformity and consistency

Nursery materials

Peatmoss

Creates an ideal growing medium for germinating seeds

Trays

Provide controlled environment for seeds to sprout

We equipment used in modern vegetable seed nurseries. These materials help seeds germinate at a rate of over 95% and with high quality.

GREENHOUSES

One of the most efficient ways to grow vegetables is using a greenhouse. With our Dutch partner Bosman Van Zaal, we provide high-tech, middle-tech greenhouses and Low-tech (Standard), version suitable for Farmers

Low tech	8Mx 30M	5M x 8M 6Mx18
High tech	60M x 40M	40M x 38.4M

FEATURES

EASY INSTALLATION
Ready-to-assemble greenhouse delivered with all required accessories. Within 2 weeks, you will have your structure assembled and ready to use.

ROBUST STRUCTURE
Made of galvanized steel tube sable to resist harsh climate variations and hard wind condition

NATURAL VENTILATION
Designed with ridge ventilation & high vertical side walls for optimal heat discharge & natural indoor climate regulation

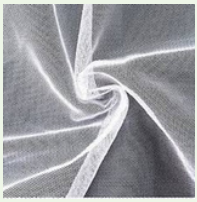

INSECT & RAIN PROOF
Anti-insect and anti-white flies' nets with 40 mesh installed on vertical sides and at front/end to ensure crop protection

CROP HOLDER
Designed with built in crop support installed on each arch, can hold more than 16Kg/m2

SAFETY ACCESS SYSTEM
Consisting of 1 outer and 1 inner doors installed with 1m clearance in between to prevent contamination

OUR SERVICES

Soil ,water and plant analysis and fertilizer advices

We measure soil, irrigation water, drinking water, crops, industrial fertilizers, compost, levels of chemical residues on crops, levels of heavy metals in water, soil and compost.

..

Alll of these are measured with the aim of increasing yields, maintaining soil fertility and controlling soil-borne diseases. All of these can be measured in a period of two (2) days to a month.

Soil ,water and plant analysis and fertilizer advices

Moisture Analyzer

Alll of these are measured with the aim of increasing yields, maintaining soil fertility and controlling soil-borne diseases. All of these can be measured in a period of two (2) days to a month.

TRAININGS

To ensure increased production, we offer training to farmers that complements all our products, along with consultancy for those aspiring to transition into professional farming. Individuals requiring specialized training can also contact us.

CONSULTANCY

Projects & Consultancy

With strong teams in 15 countries, Holland Greentech turns plans into practice. We work at farm, organizational, and regional levels to guide innovation and build resilient food systems.
Beyond horticulture, our expertise extends to water management via nature-based solutions, soil management and water-efficient irrigation for multiple crops.

Our interventions focus on:
- Entrepreneurship & Job Creation to empower farmers and local communities
- Access to Finance / Farmins as a business
- Value Chain Development to link producers to profitable and sustainable markets.
- Climate Smart Agriculture to adapt farming systems to a changing climate
- Practical Education to build skills and transfer knowledge to the next generation
- Landscape Restoration to protect ecosystems and secure long-term productivity

Through these focus areas, we contribute to green growth and sustainable economic development.
